

## Ellipse Stage

The Ellipse stage is a brand-new, lightweight stage, perfectly suited for the growing demand for smaller events. Built from our standard frame, this cover offers an affordable and versatile solution for creating a stage system on a smaller scale. The innovative design uses 3m eave for maximum utility. Available for 9m curved structures, either in full or as a conversion kit for those with an existing Custom Covers standard curve structure. In addition to its cost-effectiveness, the Ellipse stage ensures quick and easy installation, making it an ideal choice for event organizers looking to streamline their setup without compromising on impact or visual appeal.
